Welcome

Welcome to our 8th Annual Fall Bull & Female Sale. We would like to Thank You, our past customers, for showing interest in our livestock and our program. And as well, any of you new to our program, thanks for taking the time to come and evaluate our livestock.

This fall on offer we will have 39 bulls from our April/May calving program. We held back a few complete sire groups from our spring bull sale to be able to bring a strong set of bulls to this sale. Once again, we use May 10th as a cut off for any bulls born after that are saved for our 2 year old program, which are offered at our Spring Sale. The same as our past spring bull sale, we took the time to photo all the feet of the bulls on offer. We felt this was a must with the new times and people using the online videos as a way to select some of their new sires. You can find the videos at www.66ranchltd.com.

The females that we have selected for this sale consist of 72 bred purebred heifers selling as commercials. As well as 90 fancy 66 Ranch Black Angus bred commercial heifers. This year we have also decided to bring 60 fancy Black Angus commercial 2nd calvers. And as a new added feature we are pleased to have Schock Ranching consigning 50 head of commercial 2nd calvers to our sale. Tracey and Sonja purchased all these females from our bred heifer sale last fall and as well our spring pairs sale. All the 2nd calvers, both 66 Ranch and Schock Ranching's cattle are all NVB. All the purebred heifers were either A.I.'ed or bull exposed for 42 days starting July 10th. The commercial heifers were all exposed to walking bulls July 10th for just 2 cycles (42 days). The 2nd calvers were exposed to walking bulls July 14th for 47 days. The 2nd calvers are NVB, the commercial heifers are NVB and our purebred heifers carry our traditional 66 freeze brand. All these females on offer are bred to easy calving bulls and are expected to be turned out just like a cow is and calve on their own, unassisted.

Whether you need to purchase any bulls or females for replacements for your herd, or you are just interested in viewing our cattle for the first time we would really appreciate it if you could join us after the sale for an evening of socializing and a little "country hospitality!" - with proper social distancing in effect of course!

Thanks

Kelsey, Malissa, Brett and Carter

We've seen Resource at Genex Stud in Billings. A very moderate bull, extra rib x2, and super heel under this bull. We are really looking forward to more progeny off of Resource at the ranch, females calving last spring were perfect uddered. If there is a flaw in Resource progeny we haven't found it yet.

BULLS SELL IN CATALOG ORDER

BERRY CREEK VETERINARY CLINIC

The bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

The heifers and 2nd calvers have all been examined to confirm pregnancy.

In my opinion the Angus seed stock offered for sale are in excellent health and in ideal body condition.

I consider this offering to be very good replacement stock for the commercial or purebred herd.

*Sincerely,
Kirby Finkbeiner, DVM*

We are really impressed with the thick, deep females he has sired. Real Angus looking cattle. Udders are near perfect. The bull calves sired by Thunder definitely have that "extra rib." Super long, deep sided cattle. He sure puts the hip on his calves and yet maintains that calving ease we are all looking for. Appears to be that all around perfect bull!

As proof in the progeny by Bobcat and likewise his EPD numbers from a -0.0 B.W to an amazing +97 Y.W. He definitely is a true "Rancher Bull." A calving ease bull that works super on 1st calf heifers and has the performance to use his sons on your cows as well. We went back and sourced more semen on Bobcat after we saw how perfect the udders were on our 8 year old cows out of him. Expect to see more Bobcat progeny in the future.

Dam Photos

The photos of dams in this catalog may not be the traditional combed up, blown off "Pretty" pictures most people use. These are pictures of our cows in their working clothes.

For any of you that are not completely familiar with our program, we take a photo of all our cows when we tag their newborn calf. This way we can see their bags anytime of the year, and are available to show all of you our cows when their udders are at their fullest, moments after they calve.

An A.I. sire selected for strong maternal characteristics. His dam G366 is: "likely the best cow that has ever been bred, born, and raised here in our 92 year history," according to Landi at Hoover Angus. A lot said in that statement considering Hoover's exceptional cow herd! You will keep all the daughters; sons will add that ease of flesh we all look for.

LOOKING FOR LONGEVITY?

A cow at 66 Ranch is under great scrutiny from her first calf and continuing on her entire life at our place. If they show any imperfections with feet, udder or disposition they are culled right there on the spot. Any cow 4 or 5 or 6 has been scrutinized pretty thoroughly. So with that being said, we are pretty proud to have one-third of the cows that raised bulls in this sale being 7 years old and older - up to 12 years of age!

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate BW and excellent performance. We are very pleased with the growth of these cattle after weaning, competing very well with all other performance sires. Going back to Cedar Ridge these cattle display that natural ease of flesh. An A.I. sire we are really excited about. The bull was recommended to us from our good friends at Universal Semen Sales in Great Falls. From a couple past references they gave us on bulls, explaining how we would absolutely love the females, we sure have! They had told us that the True Grit female side is absolutely outstanding, so we were sold quickly on giving him a try. A low birth weight sire with tremendous growth. Looking like another all-around kind of bull.

An A.I. sire selected to bring many traits we all are searching for. Moderate birth with an EPD score of -0.3, to a very respectable YW EPD of +138. A very high fertility score on this bull, with exceptional docility, at +33 EPD score. These cattle are really demonstrating that natural ease of flesh to work in tough conditions. A real around solid sire herd.
