Welcome

**66 RANCH WELCOMES YOU TO OUR
10TH ANNUAL SPRING BULL SALE**

It is our pleasure to welcome you to our 10th Annual Spring Bull Sale!! We would like to thank all our past buyers and bidders and welcome any of you coming to evaluate our stock for the first time.

Any of you not familiar with our program should understand that at our place the cow comes first. A good cow will always raise you a good calf. With that being said, a good cow must have good feet, an excellent udder, a temperament that allows you to handle her on foot if needed, ease of flesh to be able to graze prairie grass right through the winter if needed, and the ability to milk to raise you the pounds to pay the bills at the end of the season. So at our place if the cow does not fit any one of these criteria's she is culled on the spot. These strong genes we believe will be passed onto their offspring, the bulls on offer, and our future herd replacements.

Our bulls, both yearlings and two year olds are raised at home by us. We do not believe in pushing our bulls, and letting them grow into working ranch bulls to service your cows until old age.

Our two year olds are turned out onto prairie grass in mid to late summer depending on breeding fields for our cows and asked to graze and maintain themselves with added mineral for proper growth until usually early to mid January. They are then brought into a smaller field and fed a balanced ration of 20% alfalfa and cereal silage. Then they come up closer to the feedlot in late February or early March for videos and picturing for the catalog, and stay there until sale time. Our yearlings are weaned into feedlot pens with ample room for exercise and fed a very similar ration as our two year olds, just with added oats fed at approximately 5-8 lbs/hd/day. We are finding over recent years we are having to cut the oats out of their diet by about the 1st of March to keep our yearlings from over fleshing, yet having enough condition on them to work the summer breeding your cows.

All bulls, yearlings and 2 year olds, will be semen tested and evaluated prior to the sale by our local vet in Brooks and ready to leave after the sale. If you need us to take the bulls home until a later date please let Kelsey or Malissa know prior to or after the sale, it will be greatly appreciated.

Whether you purchase a bull or just come to evaluate our program for the first time, please join us after the sale for a "Little Country Hospitality!"

Thanks for your interest!

Kelsey, Malissa, Brett and Carter

10th Annual

BULL SALE

THURSDAY, APRIL 22, 2021 at 1 PM

Bow Slope Shipping Association - Brooks, Alberta

Offering • 33 Two Year Old Black Angus Bulls • 112 Yearling Black Angus Bulls

VIEWING: Bulls can be viewed anytime before the sale at the ranch. Bulls will be available for viewing at Bow Slope Shipping Association on Wednesday, April 21.

PURCHASER'S RISK: Each animal becomes the risk of the purchaser as soon as sold. Insurance will be available sale day with Canadian Farm Insurance, Jill Wildman 1-780-305-1146.

BREEDER'S GUARANTEE: All two year old bulls and yearling bulls will be semen tested and physically examined by our local vet and sold with a breeders guarantee.

EVERY BULL at the sale will be sold with a 100% satisfaction guarantee.

SIGHT UNSEEN: In the event you are unable to attend the sale or use the online option, bids can be given to sale staff or owners with satisfaction guaranteed.

**TWO YEAR OLD & YEARLING BULLS
TO GO RIGHT AFTER THE SALE!!!**

CAN'T MAKE IT ON SALE DAY?

Our sale will be broadcast online @

DVAuction
www.dvauction.com

We are pleased that we will have the services of DV Auction. This will allow you to bid on the bulls via the internet. Of course, we would rather you attend the sale and our hospitality afterwards, but we well know today's world just keeps getting busier and busier! But, if for some reason you cannot attend, this gives you the opportunity to bid on the any animal in the live auction. Please remember to pre-register at www.dvauction.com 24 hours prior to the sale.

We also have available with this service a live video of every animal in the sale along with photos of feet. To view these just go to our website at 66ranchltd.com and click on 'view video'. Videos are also available at dvauction.com. We encourage you if possible to view the cattle at the ranch prior to the sale.

Please contact Sarah Buchanan at 1-306-681-5340 with any questions or issues with registering for the sale.

PLEASE JOIN US
AFTER THE SALE FOR
A LITTLE "COUNTRY HOSPITALITY"

PLEASE NOTE:

- All two year olds and yearlings are semen tested
- No bulls have been sold prior to the sale
- Bulls are sold in catalog order
- Updated weights & scrotal measurements will be available Sale day
- 66 Ranch reserves the right to draw 250 straws of semen at our expense and at your convenience on any bull selling in the sale. For in-herd use only.

NEWELL VETERINARY CLINIC

The two year old bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

This year the yearling bulls offered for sale by 66 Ranch have passed a breeding soundness examination and are classified as satisfactory potential breeders. They have scrotal circumference measurements above the minimum requirement recommended by the Society of Theriogenology and Western Canadian Association of Bovine Practitioners.

In my opinion the bulls offered for sale are in excellent health and in ideal body condition.

Sincerely,
Kirby Finkbeiner, DVM

RECOMMENDED HEIFER BULLS

There are probably more than the 45 recommended "Heifer Bulls" at our sale. But we feel confident that the bulls with the **bold print BW** in the catalogue will make for trouble free calving off your 1st calf heifers.

PERFORMANCE DATA

AOD: Age of Dam

BW: Actual Birth Weight

205D: Weaning weight in lbs.
adjusted to 205 days

365D: Yearling weight in lbs.
adjusted to 205 days

EPD EXPLANATION

BW: Birth weight, a prediction of a sire's ability to transmit birth weight to his progeny

WW: Weaning weight, predictor of a sire's ability to transmit weaning growth to his progeny

YW: Yearling weight, predictor of a sire's ability to transmit yearling growth to his progeny

MILK: A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters

The current Angus Average EPDs are as follows and are the numbers to compare the bulls in the catalog to:

WHY WE HOLD OUR SALE LATER IN APRIL

We, along with our veterinarian's advice, believe the yearling bulls will be old enough to semen test prior to the sale. By doing this, hopefully it will make your & our lives easier by the bulls being able to go to their new homes directly after the sale or shortly thereafter.

An A.I. sire selected for the strong maternal value of the dam that raised Renovation, as well as the maternal and paternal grand dams. You will expect the females out of Renovation to be in your herd a long time. And the bull calves sired by Renovation are a very consistent front end group of bulls, which will be expected to be passed on to your steer calves.

An A.I. sire selected for the strong maternal characteristics that he will bring. His dam G366 according to Landi at Hoover Angus says quote: "likely the best cow that has ever been bred, born, and raised here in our 92 year history." There is a lot said in that statement considering the exceptional cow herd that Hoover Angus is so well known for! You will keep all the daughters. This sire group will add that ease of flesh we are all looking for.

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I. sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 377 calves, 86 lbs. avg. on the bull calves and 77 lbs. avg. on the heifer calves. We find it much easier to have confidence in A.I.'ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.

A walking bull we purchased from Stuart Cattle Station in 2014. 82A is as deep as you will find but yet the calving ease that all ranchers are looking for. 82A may be one of the most docile bulls we have found. The female side of things is even more exciting. We went to Stuart Cattle Station before purchasing 82A and saw both the dam and grandam who was 12 at that time. After seeing both of them we were determined to own the bull!

A walking bull we purchased from Cole Creek Angus in 2015. Goes back on the sire side to some older genetics, Juanada 7 of PJM. On our tour of Cole Creek Angus, Malissa and I were absolutely amazed by the quality of females sired by this Juanada bull. Absolutely impeccable udders on those females. Really excited about 1394B because he sure stamped an incredible set of bull calves for this year's sale. Very impressive!

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate birth weight and has excellent performance. We ourselves are very pleased with the growth of these cattle after they were weaned. Competing very well with all the other performance sires. Once again, going back to Cedar Ridge these cattle are displaying that natural ease of flesh. The real "cow mans" kind of cattle! Excellent females sired by Cedar Wind with superb udders.

A walking bull raised at 66 Ranch. We selected 178C for a bull to be used on heifers. Bull calves average 81 lbs. at birth and the heifer calves 74 lbs. 178C has great performance and a dam all the cowboys would love. A moderate, deep sided Hero bred cow. Hero cattle are very well known for their extreme docility. Maternal grandam is a Leachman Right Time bred cow. Pretty confident you will want to keep all the females.

A walking bull raised at 66 Ranch. What a maternal powerhouse!! Leachman Right Time on top and the dam is one of the best Alliance bred females at the Ranch. Longevity from the Right Time, we have Right Time cows last until 17 years old at our place. The Alliance will give you the perfect udders you are looking for as well as the extreme docility we all like. The neat thing with Alliance bred into the Right Time, is this sire has great scrotal, with that, the fertility will be passed onto his progeny.

As proof in the progeny by Bobcat and likewise his EPD numbers from a -0.1 BW to an amazing +98 YW. He definitely is a true "Rancher Bull." A calving ease bull that works super on 1st calf heifers and has the performance to use his sons on your cows as well. We went back and sourced more semen on Bobcat after we saw how perfect the udders were on our 7 year old cows out of him. Expect to see more Bobcat progeny in the future.

A walking bull purchased from Cole Creek Angus. We selected this bull after touring the cow herd again at Cole Creek. 76D's dam was in our minds one of the best cows in their herd. After calving several daughters out of 76D it is confirmed, he will put a perfect udder on your females.

DO YOU CARE ABOUT THE COW
THAT RAISED YOUR BULL?
'CAUSE WE SURE DO!

LOOKING FOR LONGEVITY?

A cow at 66 Ranch is under great scrutiny from her first calf and continuing on her entire life at our place. If they show any imperfections with feet, udder or disposition they are culled right there on the spot. Any cow 4 or 5 or 6 has been scrutinized pretty thoroughly. So with that being said, we are pretty proud to have 74 cows that raised bulls in the sale being 6 years old and older, all the way up to 16 years old.

LEAN ON YOUR MOMMA

Dam Photos

The photos of dams in this catalog may not be the traditional combed up, blown off "Pretty" pictures most people use. These are pictures of our cows in their working clothes.

For any of you that are not completely familiar with our program, we take a photo of all our cows when we tag their newborn calf. This way we can see their bags anytime of the year, and are available to show all of you our cows when their bags are at their fullest, moments after they calve.

A walking bull purchased from F-R Ranch, Murray and Cam Fraser. People raising cattle for all the right reasons. Functional cattle, with a particular concern about the dam behind the bull. That being said 5195 progeny will return you the females you want in your keeper pen. The Mechanic daughters we saw at Frasers were all super uddered. 5195 carried that ease of flesh year round. A super disposition on this bull as well.

An A.I sire we are still really excited about. We are really impressed with the thick, deep females he has sired. Real Angus looking cattle. Udders are near perfect. The bull calves sired by Thunder definitely have that "extra rib." Super long, deep sided cattle. He sure puts the hip on his calves and yet maintains that calving ease we are all looking for. Appears to be that all around perfect bull!

A walking bull raised at 66 Ranch. A super strong set of calves sired by 151F. Moderate birth with excellent weaning weights. The sire to 151F give us super uddered daughters and the dam to 151F is 13 years old and not a fault in her. Plan to keep all the female progeny. Bull calves avg. 81 lbs, heifer calves avg. 75 lbs.

An A.I. bull we selected to use with excellent performance and growth with great carcass numbers. With Rito on the top side of the pedigree, should really help with any foot issues and the dam's side of the pedigree is stacked with female makers. He will definitely make the females we are all striving for.

A walking bull we purchased from Cole Creek Angus in 2015. Goes back on the sire side to some older genetics, Juanada 7 of PJM. On our tour of Cole Creek Angus, Malissa and I were absolutely amazed by the quality of females sired by this Juanada bull. Absolutely impeccable udders on those females. Really excited about 1394B because he sure stamped an incredible set of bull calves for this year's sale. Very impressive!

As proof in the progeny by Bobcat and likewise his EPD numbers from a -0.1 BW to an amazing +98 YW. He definitely is a true "Rancher Bull." A calving ease bull that works super on 1st calf heifers and has the performance to use his sons on your cows as well. We went back and sourced more semen on Bobcat after we saw how perfect the udders were on our 7 year old cows out of him. Expect to see more Bobcat progeny in the future.

An A.I. sire selected to use for his moderate birth to exceptional yearling weight ratio. EZ Money's pedigree is real attractive too, the bottom side stacks Connealy Thunder on top of Leachman Right Time. Should definitely give you the females that will stay in your herd for a long time.

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate birth weight and has excellent performance. We ourselves are very pleased with the growth of these cattle after they were weaned. Competing very well with all the other performance sires. Once again, going back to Cedar Ridge these cattle are displaying that natural ease of flesh. The real "cow mans" kind of cattle! Excellent females sired by Cedar Wind with superb udders.

A walking bull we purchased from Stuart Cattle Station in 2014. 82A is as deep as you will find but yet the calving ease that all ranchers are looking for. 82A may be one of the most docile bulls we have found. The female side of things is even more exciting. We went to Stuart Cattle Station before purchasing 82A saw both the dam and grandam who was 12 at that time. After seeing both of them we were determined to own the bull!

A walking bull purchased from our good friends Murray & Cam Fraser. Guys raising bulls for the right reasons! We selected 6041 to walk on heifers, he calves like a dream! His dam is "a great cow!" Murray Fraser told me. Touring their cow herd I kind of thought they were all great cows, so she is obviously is a special one if he classes her great amongst the herd of great ones I saw!
