- 50 Long Yearling Purebred Black Angus Bulls
- 70 66 Ranch Purebred Black Angus
Bred Heifers - *Selling as Commercials*
- 85 Fancy Black Angus 2nd Calvers NVB
- 100 Very Fancy 66 Ranch Black Angus
Commercial Bred Heifers NVB

Welcome

Welcome to our 6th Annual Fall Bull & Female Sale. We would like to say Thank You to our past customers for showing interest in our livestock and our program. And as well, any of you new to our program, thanks for taking the time to come and evaluate our livestock.

This fall on offer we will have 50 bulls from our April/May calving program. We held back 4 or 5 complete sire groups from our spring bull sale to be able to bring a strong set of bulls to this sale. Once again, we use May 10th as a cut off for any bulls born after that are saved for our 2 year old program, which are offered at our Spring Sale.

The females that we have selected for this sale consist of 70 bred Purebred heifers selling as commercials. As well as 100 fancy 66 Ranch bred commercial heifers. And new this year 85 Fancy black angus commercial 2nd Calvers. The Purebred heifers and commercial heifers were exposed to a walking bull on July 10th. The only reason we offer these heifers to you is strictly a way for us to manage our female Purebred numbers. All the heifers were bred for two breeding cycles (40 days). These heifers all originate from our 66 Ranch commercial and Pure Bred herd.

The 2nd Calvers and commercial heifers are all NVB. And the Purebred heifers will carry our traditional 66 freeze brand. All these females on offer, just like the ones we have at home, are expected to be turned out just like a cow and calve on their own, unassisted.

Whether you need to purchase any bulls or females for replacements for your herd, or you are just interested in viewing our cattle for the first time. We would really appreciate it if you could join us after the sale for an evening of socializing and a little "country hospitality!"

Thanks

Kelsey, Malissa, Brett and Carter

We've seen Resource at Genex Stud in Billings. A very moderate bull, extra rib x2, and super heel under this bull. We saw them collecting "Resource" and the collection team at Genex said you do not have to worry about Libido; Resource is very easy to collect. We are really looking forward to more progeny off of Resource at the ranch, females calving last spring were perfect uddered. If there is a flaw in Resource progeny we haven't found it yet.

A walking bull we purchased from Stuart Cattle Station, spring of 2014. 82A is as deep as you will find but yet the calving ease that all ranchers are looking for. 82A may be one of the most docile bulls we have found. The female side of things is even more exciting. We went to Stuart Ranch before purchasing 82A and saw both the dam and grandam. The grandam was 12 at that time and after seeing both of them we were determined to own the bull!

NEWELL VETERINARY CLINIC

The bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

The heifers and 2nd calvers have all been examined to confirm pregnancy.

In my opinion the Angus seed stock offered for sale are in excellent health and in ideal body condition.

I consider this offering to be very good replacement stock for the commercial or purebred herd.

*Sincerely,
Kirby Finkbeiner, DVM*

An A.I. heifer bull we used from Cole Creek bloodlines. Extreme docility with a very moderate birth weight and has excellent performance. We ourselves are very pleased with the growth of these cattle after they were weaned. Competing very well with all the other performance sires. Once again, going back to Cedar Ridge these cattle are displaying that natural ease of flesh. The real "cow mans" kind of cattle! Excellent females sired by Cedar Wind with superb udders.

Maternal, Maternal, Maternal! 46P was raised by Cole Creek Angus in Billings Montana. We toured their cow herd last year again. Possibly one of the best herds we have been in. Not a bad foot or udder to be found. We saw a large number of 46P sired cows that were 13 years old at the time, that being the reason we sourced 46P semen to use in our herd. Along with the super strong maternal side, 46P has sired some dandy bull calves. Real easy fleshing, deep sided cattle.

A walking bull we acquired originating from Cole Creek Angus near Billings, Montana. Once again the female side of 181Y is extremely exciting. Could not find a bad foot or udder in their cow herd. Cole Creek Angus bloodlines are extremely attractive if you want your cows to be in your herd for a long time. 181Y calves all demonstrate the extreme ease of flesh their father had. The 181Y daughters in our herd all have excellent udders, deep, easy keepers. A favorite at the Ranch.

LOOKING FOR LONGEVITY?

A cow at 66 Ranch is under great scrutiny from her first calf and continuing on her entire life at our place. If they show any imperfections with feet, udder or disposition they are culled right there on the spot. Any cow 4 or 5 or 6 has been scrutinized pretty thoroughly. So with that being said, we are pretty proud to have many of the cows that raised bulls in this sale being 7 years old and older, all the way up to 16 years of age!

CAN'T MAKE IT SALE DAY?

A new A.I. sire we are really excited about. The bull was recommended to us from our good friends at Universal Semen Sales in Great Falls. From a couple past references they gave us on bulls, explaining how we would absolutely love the females, we sure have! They had told us that the True Grit female side is absolutely outstanding, so we were sold quickly on giving him a try. A low birth weight sire with tremendous growth. After A.I.ing 30+ heifers to True Grit we have confidence he can be used safely on heifers. Looking like another all around kind of bull.

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 301 calves, 86 lbs. avg. on the bull calves and 77 lbs. avg. on the heifer calves. We find it much easier to have confidence in A.I.'ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.

A walking bull at the ranch purchased from Cole Creek Angus from Billings, Montana area. We have talked before about the incredible females at Cole Creek, but maybe hadn't mentioned their cows are expected to work for them in very tough semi-mountains/ hard brown grass country. Cole Creek cattle have ease of flesh bred into them and 1144B definitely is easy fleshing. And once again out of a near perfect dam.

A walking bull we purchased from Cole Creek Angus in 2015. Goes back on the sire side to some older genetics, Juanada 7 of PJM. On our tour of Cole Creek Angus, Malissa and I were absolutely amazed by the quality of females sired by this Juanada bull. Absolutely impeccable udders on those females. Very impressive!
