# Welcome

## TO OUR 12<sup>TH</sup> ANNUAL SPRING BULL SALE!

We would like to thank you for taking the time to evaluate our program, we truly are humbled by it! As well, thank you for your previous purchases and welcome to any of you who are evaluating our program for the first time.

For any of you not all that familiar with our program, we are a very maternal focused program. The cow here has to perform to our expectations or else she is not here, it IS that simple! Our purebred cows run out year round and have to take care of themselves. Running a larger purebred herd with little "people" power, the cows have to function with a "no hands on" approach. Actually our purebred cows are managed exactly the same as our commercial herd except we get to weigh and tag all the calves off this herd at birth. At that time a photo is taken of the new mother's udder, often just as the calf has just had its first suck, so we know and have the ability to show you folks her bag at her fullest. The bags are all rated at that time, foot scores are taken if the conditions allow us, and a confirmation score is taken as well of her body condition. If any of these things are not satisfactory to us at this time, she is culled on the spot. We also foot score the females at A.I. time in the chute, when their feet can be examined properly.

Our bulls are all carefully grown into working ranch bulls at our place to provide you with a product that will last for several breeding seasons. The weaned bull calves go into our feedlot and are placed on a backgrounding ration until spring sale time. We sort the bull calves typically in January into their age groups for our upcoming bull sales. The spring sale yearling bulls to sell are our calves born roughly April 10th to April 30th. The calves born from May 1st to May 10th are sorted to another pen to be kept for our bull sale in December. The rest of the calves born from May 11th until approximately June 10th are sorted into another pen and are held over to be our 2 year old bulls for our Spring April Bull Sale. This is the way we feel that we can offer a real 2 year old bull program. The bulls sorted off for our 2 year olds in the spring sale never have any bulls pulled out of the pen, even not for ourselves, other than the ones that need to be culled. The bulls that are destined to be our spring sale 2 year old bulls will typically get turned out to pasture midsummer and will remain out foraging until winter tells us we need to bring them into a smaller pasture to finish winter out, and at that time being fed a ration as simple as supplement with their vitamins and minerals, 15 to 20% alfalfa, and a cereal silage. NO GRAIN is fed to these growing bulls. They are fed at one end of the pasture and expected to walk to the other end of the pasture for their water source. We feel it is extremely important to keep these bulls active in the winter months. This is critical to be able to create an athlete that will excel in the working months when you need them for breeding your females and build a body that will last for several years for you our customers.

We of course would love if you all can make it in person to our sale, but if for some reason you are unable to attend you will be able to view and bid on our offering on DV Auction and as well DLMS. DV Auction has done all of our videos and as well, with their patience and ours, have foot photos of all the bulls in the offering on each of their walks that you typically watch when you look through videos of bulls on either DLMS or DV Auction. Please, if you find the time to look through some or all of the videos take a look at the foot photos, it may save some time sale morning trying to look at their feet while multiple people are looking through the bulls. All the foot photos were done at home on concrete. Please let us know if you appreciate this option? Another option if you are not comfortable with or do not have access to a computer sale day, sale representatives or sale staff are available by phone or leave a proxy bid, whatever suits your needs.

The bulls and dams of the bulls on offer are available for viewing any time prior to the sale at the ranch. Bulls will be available for viewing at Bow Slope Shipping Association in Brooks in the afternoon of April 19th right up until sale time. Please come early on April 20th to view the bulls prior to sale time at 1:30 PM MST sharp.

And whether you purchase a bull or just come to evaluate our cattle for the first time, please join us after the sale for a fantastic Angus Steak prepared by the Brooks Hotel staff and enjoy a little 66 Ranch "Country Hospitality!"

Thanks for your interest!

*Kelsey, Malissa, Brett and Carter*

YEARLINGS: LOTS 1-17 & 57-127  
TWO YEAR OLDS: LOTS 18-56

12<sup>th</sup> Annual

# BULL SALE

THURSDAY, APRIL 20, 2023 at 1:30 PM

Bow Slope Shipping Association - Brooks, Alberta

*Offering* • 39 Two Year Old Black Angus Bulls • 88 Yearling Black Angus Bulls

**VIEWING:** Bulls can be viewed anytime before the sale at the ranch. Bulls will be available for viewing at Bow Slope Shipping Association on Wednesday, April 19.

### CAN'T MAKE IT ON SALE DAY?

Our sale will be broadcast online @

We are pleased to announce that we will have the services of DVAuction and DLMS. This will allow you to bid on the bulls via the internet. Of course, we would rather you attend the sale and our hospitality afterwards, but we well know today's world just keeps getting busier and busier! But, for some reason you cannot attend, this gives you the opportunity to bid on the bulls at the live auction. Please remember to pre-register at [www.dvauction.com](http://www.dvauction.com) or [www.dlms.ca](http://www.dlms.ca) 24 hrs. prior to the sale. We also have available with this service a live video of every animal in the sale & photos of their feet. To view these videos go to our website [66ranchltd.com](http://66ranchltd.com) and just click on the video links. We encourage you if possible to view the cattle at the ranch prior to the sale.

Please contact Sarah Hasson at 1-306-681-5340 with DV or Mark Shologan at 1-780-699-5082 for DLMS with any questions or issues with registering for the sale.

PLEASE JOIN US  
AFTER THE SALE FOR  
A LITTLE "COUNTRY HOSPITALITY"

**PLEASE NOTE:**

- All two year olds and yearlings are semen tested
- No bulls have been sold prior to the sale
- Bulls are sold in catalog order
- Updated weights & scrotal measurements will be available Sale day
- 66 Ranch reserves the right to draw 250 straws of semen at our expense and at your convenience on any bull selling in the sale. For in-herd use only.

**BERRY CREEK VETERINARY SERVICES**

The two year old bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

This year the yearling bulls offered for sale by 66 Ranch have passed a breeding soundness examination and are classified as satisfactory potential breeders. They have scrotal circumference measurements above the minimum requirement recommended by the Society of Theriogenology and Western Canadian Association of Bovine Practitioners.

In my opinion the bulls offered for sale are in excellent health and in ideal body condition.

Sincerely,  
Kirby Finkbeiner, DVM

**RECOMMENDED HEIFER BULLS**

There are probably more than the 42 recommended "Heifer Bulls" at our sale. But we feel confident that the bulls with the **bold print BW** in the catalog will make for trouble free calving off your 1st calf heifers.

**PERFORMANCE DATA**

AOD: Age of Dam

BW: Actual Birth Weight

205D: Weaning weight in lbs. adjusted to 205 days

365D: Yearling weight in lbs. adjusted to 365 days

**EPD EXPLANATION**

**CE:** Calving ease, predicts the ease with which a sire's calves will be born when bred to first-calf heifers. The higher the number, the higher the probability heifers will calve with no assistance.

**BW:** Birth weight, a prediction of a sire's ability to transmit birth weight to his progeny.

**WW:** Weaning weight, predictor of a sire's ability to transmit weaning growth to his progeny.

**YW:** Yearling weight, predictor of a sire's ability to transmit yearling growth to his progeny.

**MILK:** A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters.

**MCE:** Maternal calving ease. The higher the number, the higher the probability that daughters will not require assistance at calving time.

Average EPDs for all Black Calves born in 2022

These are the numbers to compare the bulls in the catalog to:

EPDs	CE	BW	WW	YW	MILK	MCE
	+3.5	+2.0	+52	+92	+23	+6.7

EPDs in this catalog are as of March 24/23

A walking bull raised at 66 Ranch. What a fortunate thing happening to us with this bull! He checks all the boxes, very moderate birth, great performance, and awesome looking female progeny, great scrotal, feet are superb, natural ease of flesh. We are very, very high on these 1D bred progeny. The rancher's kind of cattle out of this bull! We have 292 progeny registered in our herd. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

An A.I. sire we selected for his calving ease and to use for his proven ability to sire the females we are all striving to build. Real good haired cattle, moderate frame, great foot and phenotypically as pretty as they come. Bull calves average birthweight is 78 lbs. Heifer calves is 73 lbs.

## CALVING EASE BULLS BW IN **BOLD** PRINT

## Dam Photos

After conversations between Malissa and I over the past couple years, we thought being as we were such a maternal based program people may appreciate seeing some photos of our females in our catalogs. These photos may not be the traditional combed up, blown off "Pretty" pictures most people put in their catalogs. These are pictures of our cows in their working clothes.

For any of you that are not completely familiar with our program, we take a photo of all our cows when we tag their newborn calf. This way we can see their bags anytime of the year, and are available to show all of you our cows when their bags are at their fullest, moments after they calve.

An A.I. sire we chose to use for his moderate birthweight and yet have the power to grow well into weaning and right until they are hanging on a rail. Cowboy Up progeny are known for their strong foot structure. Maternally, is a very positive thing as well, an Upward 307R on the bottom side of the pedigree are going to give you good footed, super uddered, feminine females. Bull calves average birthweight is 82 lbs. Heifer calves is 79 lbs.

## WHY WE HOLD OUR SALE LATER IN APRIL

We, along with our veterinarian's advice, believe the yearling bulls will be old enough to semen test prior to the sale. By doing this, hopefully it will make your & our lives easier by the bulls being able to go to their new homes directly after the sale or shortly thereafter.

WE WELCOME YOUR VISIT TO VIEW THE BULLS AT 66 RANCH PRIOR TO THE SALE

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 443 calves, 86 lbs. average on the bull calves and 78 lbs. average on the heifer calves. We find it much easier to have confidence in A.I.ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.

A walking bull at the ranch raised by us, a "1D" son. 1D has quickly risen to the top at our place. Raising sons like 48G that are just the right type. Both 1D and 48G stamp their calves the same. Deep, soggy, soft made, moderate, easy to look at Angus cattle. Foot quality is very strong, udders on our milking daughters have been absolutely outstanding! 48G's dam is about as good as they come, expect females out of the 48G sons to remain in the herd for a long time. With very moderate birthweight on the dam's side and 1D having moderate birth, feel safe using 48G progeny on 1st calf heifers. Bull calves average birthweight is 77 lbs. Heifer calves is 74 lbs.

	+8.0	+1.1	+41	+63	+21	+11.0

A walking bull purchased from C & L Beasley Cattle. We selected this calving ease bull for his strong maternal presence, his dam at 17 years old still had a perfect udder and perfect feet. The feet were definitely passed on to her son, we knew we had to own 78F when we seen him standing on the concrete, a perfect foot under this bull! We used him exclusively on first calf heifers, he is a "heifer bull." Bull calves average birthweight is 76 lbs. Heifer calves is 73 lbs.

A walking bull raised at 66 Ranch. What a maternal powerhouse!! Leachman Right Time on top and the dam is one of the best Alliance bred females at the Ranch. Longevity from the Right Time, we have Right Time cows last until 17 years old at our place. The Alliance will give you the perfect udders you are looking for as well as the extreme docility we all like. The neat thing with Alliance bred into the Right Time, is this sire has great scrotal, with that, the fertility will be passed onto his progeny. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

A Resource bred walking bull we purchased from Bandura Ranches. A huge middle on this bull with very correct foot and leg structure. The females off of 173G should be the kind we are all striving to find, with the combination of Resource on the top side and Sitz Upward on the bottom side of the pedigree will produce deep sided, strong uddered, feminine females. Bull calves average birthweight is 78 lbs. Heifer calves is 77 lbs.

An extremely deep sided walking bull purchased from Hamilton Farms. We selected him for his calving ease and extremely good performance. His dam is a favorite at Hamilton's, a moderate framed cow with an excellent level udder. We sadly lost 135G through the winter of 2021 to an injury, fortunately though we have semen in the tank to utilize his genetics for years to come. Bull calves average birthweight is 79 lbs. Heifer calves is 76 lbs.

As proof in the progeny by Bobcat and likewise his EPD numbers from a 0.0 B.W to an amazing +96 Y.W. He definitely is a true "Rancher Bull." A calving ease bull that works super on 1st calf heifers and has the performance to use his sons on your cows as well. We went back and sourced more semen on Bobcat after we saw how perfect the udders were on our 8 year old cows out of him. Expect to see more Bobcat progeny in the future. Bull calves average birthweight is 73 lbs. Heifer calves is 68 lbs.

AOD: AGE OF DAM

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 443 calves, 86 lbs. average on the bull calves and 78 lbs. average on the heifer calves. We find it much easier to have confidence in A.I.'ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.

A walking bull raised by us, a super long, round and curvy extremely strong footed sire. His dam 4008P was here until she was 15 years old. Pretty good feeling having the longevity bred into your cattle with the known longevity of the 17Z Alliance on the top side of the pedigree as well. Bull calves average birthweight is 80 lbs. Heifer calves is 74 lbs.

A walking bull at our place purchased from Hoover Angus. We selected this bull for his added growth and his absolutely perfect feet. His dam walked the pastures at Hoover's until the age of 16 years old. They pictured her feet at the age of 14 and they are some of the straightest toes I've laid eyes on. Hoover No Doubt the sire, is also known for having a super strong foot. So if you are wanting to grow big steer calves that weigh up, and are wanting females to be in the herd for a long time. Make sure you take a look at the 6H sons on offer. Bull calves birthweight is 83 lbs. Heifer calves is 78 lbs.

An A.I. sire we chose to use for his supreme foot quality. If you are looking for extra ease of flesh in your cattle without any grain try a Pinebank 443 son. We were told to expect ease of flesh, after seeing our first set of calves grow into yearlings, it is very evident that the progeny will be very easy keeping. Pinebank 443 dam in 2021 was still walking the pastures at age 17. Expect longevity in these cattle as well. Bull calves average birthweight is 75 lbs. Heifer calves is 72 lbs. Use these sons with ease of calving on your 1st calf heifers as well!

A walking bull at the ranch purchased from the super people at Merit Cattle Co., Trent and Janelle Leibreich. We purchased him because he was in our eyes one of the longest, deepest, yet moderate herd bulls in their pen that season. But the determining factor for us deciding to own him was the maternal value he would bring. 6 of the 7 cows on the front of the pedigree were all raised at Merit. Proven, predictable maternal breeding bull here. 32H has and will continue to be bred to some of our top females at our place.

Be sure to plan to retain all the heifer calves from 32H, they will be in the replacement pen and in the cow herd for a long time. Bull calves average birthweight is 87 lbs. Heifer calves is 78 lbs.

An A.I. sire selected for the strong maternal value of the dam that raised Renovation, as well as the maternal and paternal grand dams. You will expect the females out of Renovation to be in your herd a long time. And the bull calves sired by Renovation are a very consistent front end group of bulls, which will be expected to be passed on to your steer calves. Bull calves average birthweight is 85 lbs. Heifer calves is 80 lbs.

A walking bull raised at 66 Ranch. What a fortunate thing happening to us with this bull! He checks all the boxes, very moderate birth, great performance, and awesome looking female progeny, great scrotal, feet are superb, natural ease of flesh. We are very, very high on these 1D bred progeny. The rancher's kind of cattle out of this bull! We have 292 progeny registered in our herd. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

A walking bull raised at 66 Ranch. A super strong set of calves sired by 151F. Moderate birth with excellent weaning weights. The sire to 151F give us super uddered daughters and the dam to 151F is 15 years old and not a fault in her. Plan to keep all the female progeny. Bull calves avg. 84 lbs, heifer calves avg. 75 lbs.

	+14.0	-0.6	+62	+108	+30	+16.0

A walking bull at the ranch purchased from the Hoover Angus operation in Iowa, well known for producing super females with their genetics. We selected 222H for his ability to calve to 1st calf heifers as well bring superior growth after they are born. 222H is one of the favorites at the ranch for the extra rib he definitely carries. A super footed, long, moderate big hipped bull. Use his sons confidently on your heifers. Bull calves average birthweight is 75 lbs. Heifer calves is 65 lbs.
